- > A complete heavy duty cloud PC solution for desktop experience

'Ant Play' has launched first-of-its-kind, a cloud based gaming platform that turns any smart device into a gaming PC. The idea is to simplify the streaming of high-quality, immersive games on low, medium and even aging desktops and laptops.

Introducing Ant Play | India's First Ever Cross - Platform Cloud Gaming Service

Ant Play aims to make high end, fast paced gaming more accessible via leveraging cloud services, Ant Play makes it easy to stream high-quality, immersive games on low, medium and even aging desktops and laptops. Players can enjoy Ant Play on their favorite devices without lengthy downloads or updates, expensive hardware or complicated configuration. It gives the ability to play at FHD, 60fps, a latency of 10-20 ms, and all of it with a connectivity currently found in most homes between 15Mb/s to 50Mb/s.

"Ant Play is new and promising software designed to create easy access to play great games on the devices customers already own and love. The users will be benefited with the best configuration at the minimum subscription price," said Himanshu Jain, Founder, Ant Play.

Any Game, Any Configuration, Any Budget!

While other services in the field offer one plan solution only Ant Play offers two predefined configurations at launch with one based on a quad core CPU and GTX 1660 and another based on an octa-core CPU and RTX 3060. Users can choose the configuration and pay for intervals ranging from as small as 7 days to a full month giving the highest level of transparency to the subscribers so they can choose what fits their needs, requirements, and budgets. Since the services start from as low as Rs. 999, Ant Play is definitely on the affordable side considering the current situation of graphics card pricing.
